***Allowable Subject Matter***

1. The following is an examiner's statement of reasons for allowance: the prior art does not teach or fairly suggest a method for optimizing real-time communication between one or more remote devices on a network, the method comprising: receiving one or more meaningful control packets from at least one remote device, the one or more meaningful control packets being usable to maintain a quality of service for the real-time communication; receiving one or more dummy control packets from at least one remote device, the format of the dummy control packets and the format of the meaningful control packets conforming to a same control protocol; and approximating the bandwidth available on the network based on the difference in arrival times between at least one of the meaningful control packets and at least one of the dummy control packets, *computing a quotient resulting from the division of the size of the meaningful control packets and dummy control packets by the difference in arrival times of the meaningful control packets and dummy control packets*, as recited in independent claims 1, 8 and 10.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
